WHAT'S --- BOAR?

Since 2009, Custom Chrome Europe has inspired the scene with a new slogan: „Bolt On and Ride“. While neither „Bolt On“ nor „Ride“ are new themes in a long established and creative customizing scene, the CCE team has successfully combined both themes into now annually built custom bikes which are based on existing motorcycle models that are modified with the latest and best parts available from the worldwide aftermarket. „Bolt On“ stands for easy to mount custom parts, some to be installed by the owner or garage customizers, others, more sophisticated parts, by professional CCE partners, custom shops or authorized Harley-dealers – but it never stopped the individual builder from further individualization, be it by color, surface finish treatment, engravings or what ever creative ideas come to mind. And the “Ride” part? This not just for pleasure, but assures the CCE team that these parts will work under rough and sometimes extreme conditions when the CCE team is “On the Road” to events all over Europe. But yes, the “Ride” part is also fun ...

Custom Chrome Europe 2018 „Bolt On and Ride“ Milwaukee Eight Softtail Street Bob: Thunderbike's „Bolt On“ conversion does it dirty! What defines the „retro look“ of the M8 motor, are some cool exchange covers by EMD, which just became available. Check them out in detail! The ribbed Cam Cover and the ribbed Rocker Box Covers and Primary Cover are available in four finish versions: Raw, black, semi polished and black cut. The latter version is mounted to the „Cross Bob“ M8. Thunderbike added their own „Grand Classic“ air filter and ignition coil relocation kit for achieving a „new school“ look with four ignition cables. Mission accomplished! Dr. Jekyll & Mr. Hyde exhaust systems have been adapted for the new M8 motor from the very start the engine was introduced in the 2017 touring models. The stock Harley wheels were exchanged for RevTech's „Nitro Black“ wheels in „Midnight“ contrast design, of course with a full complement of fitting brake rotors and drive pulley to complete the packet. The „Old School“ look is further highlighted by the choice of multi-terrain profiled Heidenau K60 Scout tires. The parts list also includes components by Chopper Kings (handlebar), Rebuffini (controls and switches), Chopper Kulture (head light), LePera (seat), Hell's Kitchen (rear indicators, 3-in-1 function), TLT (electric parts adaptation) and – of course – Thunderbike, who added their „Rubber“ footpegs to the OEM Mid-Controls, sidemount license plate and other details that define this cool custom rider.

A man with a beard and sunglasses, wearing a plaid jacket and a helmet, is riding a teal and black Thunderbike motorcycle on a paved road. The motorcycle has a large round headlight and a teal fuel tank. The background shows a green field and a forest of trees.
